Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 1-6 and 13-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 5, 2007.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7 and 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Summers et al. (U.S. Patent No. 5,037,431). Summers et al. disclose the invention substantially as claimed including a method of jet cutting skin (col. 9, line 21 - col. 10, line 45) with the steps of automatically jet cutting skin into a selectable pattern (col. 10, line 10; a circular pattern), automatically tensioning the skin concurrently with the cutting step (the vacuum that is applied to the tissue area creates tension along the length of tissue under the device), jet cutting human skin (col. 9, line 29), and jetting a biocompatible saline solution (col. 4, line 64).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Summers et al., as applied above to claim 7. Summers et al. disclose the invention substantially as claimed including jet cutting human skin (col. 9, line 29) and cutting the skin into a predetermined perimeteral shape (col. 10, line 10; a circular pattern). Summers et al. disclose the invention substantially as claimed except for making a first cut in skin and making a second cut in the skin spaced apart from the first cut by 0.025 inches. Summers et al. does disclose that the surgeon can move the device to a farther away from the tissue area to create a larger cutting area. The pressure of the jets is then changed so that the same force is hitting the tissue to be removed as if it were closer to the skin. It would have been obvious to one having ordinary skill in the art at the time of the invention to have modified the method of Summer et al. to create two cuts of tissue that are about 0.025 inches apart, rather than moving the device away from the tissue, in order to extract a desired amount of tissue.
